THUSHAN GAMAGE

SOFTWARE ENGINEERING UNDERGRADUATE · PHP WEB DEVELOPER & DEVOPS ENTHUSIAST

+94 703 565 012 · stgamage5012@gmail.com · linkedin.com/in/thushangamage-3a5b23334 · github.com/ThushanDev · Nawala, Sri Lanka

PROFESSIONAL SUMMARY

Software Engineering undergraduate at the Open University of Sri Lanka with hands-on experience building PHP-driven web applications, Android mobile apps, and automated cloud pipelines. Designed and shipped a full-featured Android educational application (EduFix) across multiple iterations, built production-ready CI/CD infrastructure on AWS EC2 using Docker and GitHub Actions, and delivered real-world UI/UX designs for agriculture and personal finance domains in Figma. Certified in Ethical Hacking, Docker Containerisation, and Web Design, with a growing PHP and MySQL back-end skill set complemented by strong DevOps and cybersecurity foundations. An active leader — serving as Assistant Editor on the IESL Student Chapter Executive Committee, Organizing Committee Member for IEEE Jamboree 2025, and Committee Member of the Mechatronics Engineering Society at OUSL. Driven to build web systems and applications that are scalable, secure, and genuinely useful.

KEY PROJECTS

EduFix — Android Educational Application

Java · Android SDK · Gradle · Android Studio

Designed and developed EduFix, a full-featured Android mobile application in Java to deliver educational content and tools to students. Shipped multiple iterations (EduFix, EduFix V3) with progressive UI improvements, new features, and bug fixes. Applied Android SDK best practices including activity lifecycle management, RecyclerView adapters, and modular navigation architecture — achieving a cleaner user experience across 2+ major releases.

github.com/ThushanDev/EduFix

Node.js CI/CD Pipeline — AWS EC2 & GitHub Actions

Node.js · Docker · GitHub Actions · AWS EC2 · Shell Scripting

Built a production-ready CI/CD pipeline for a Node.js application using GitHub Actions, Docker, and AWS EC2. Automates the full build-test-deploy cycle — including Jest testing, Docker image builds, Docker Hub pushes, and zero-downtime SSH deployment to EC2 — with environment variable management, health checks, and non-root Docker execution for hardened security.

Parcel Delivery Management System

Java · Dijkstra's Algorithm · MaxHeap · Data Structures

Built a parcel delivery dispatch system in Java applying core data structures and algorithms. Modelled a 5-node city road network as a weighted graph and implemented Dijkstra's shortest-path algorithm to compute optimal vehicle routes. Designed a custom MaxHeap priority queue to schedule deliveries by urgency, and a vehicle assignment engine selecting the nearest available vehicle — demonstrating graph theory, heap data structures, and greedy algorithms in a real-world dispatch scenario.

Student Management System

Java · OOP · Inheritance · NetBeans

Implemented a Java student management system with a 3-tier class hierarchy — base *Student* extended by *UndergraduateStudent* and *PostgraduateStudent*. Applied encapsulation, inheritance, and method overriding to deliver specialised grading logic (Distinction, Merit, Pass, Fail) with weighted research scoring and research area tracking for postgraduate students.

Digital Wallet & Currency Converter

Java · OOP · Interfaces · NetBeans

Built a digital wallet application in Java using interface-based design. Implemented *Wallet* and *ExchangeRateProvider* interfaces with concrete classes handling load, spend, and multi-currency conversion (LKR → USD/EUR). Outputs structured JSON-formatted exchange results, demonstrating dependency injection, interface segregation, and financial transaction modelling.

UI & DESIGN PROJECTS

FarmEase — Farming & Agriculture Mobile App *Figma · UI/UX Design · Mobile Design*

Designed a comprehensive mobile UI for farming and agriculture management, enabling farmers to monitor crops, manage farm activities, and access agricultural insights. Focused on intuitive navigation and clean visual hierarchy suited for field use.

figma.com/proto/n8CZ8u2ZlzcAmp7v8rXG2N

Bill Sync — Personal Finance Mobile App *Figma · UI/UX Design · Mobile Design*

Designed a personal finance management mobile UI to help users track income, expenses, and budgets at a glance. Emphasised clear data visualisation, a minimal interface, and user-friendly flows for everyday financial decision-making.

TECHNICAL SKILLS

PROGRAMMING	PHP, Java, JavaScript, Python, Kotlin, Bash Scripting, SQL, HTML5, CSS3
WEB DEVELOPMENT	PHP (Back-End), MySQL, REST APIs, Responsive Design, Bootstrap, Node.js, UI/UX Fundamentals
DATABASES	MySQL, phpMyAdmin, SQL (DDL/DML), Relational Schema Design
MOBILE DEV	Android Development, Android Studio, Android SDK, Gradle, Activity Lifecycle Management
DEVOPS & CLOUD	Docker, Docker Compose, GitHub Actions, CI/CD Pipelines, AWS EC2, Nginx, Linux (Ubuntu, Kali), SSH
CYBERSECURITY	Ethical Hacking, Penetration Testing, Vulnerability Assessment, Network Security, Nmap, Metasploit, Wireshark
DOMAIN KNOWLEDGE	MVC Architecture, OOP, SDLC, Agile, CRUD Application Design, Session & Auth Management
TOOLS	Git, GitHub, VS Code, IntelliJ IDEA, NetBeans, Figma, Adobe Illustrator, Adobe Photoshop
SPOKEN LANGUAGES	Sinhala (Native), English (Professional)

EDUCATION

Bachelor of Software Engineering (Honours)

The Open University of Sri Lanka

2024 – Present | Nawala, Sri Lanka

Relevant Coursework: Software Design & Architecture, Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Web Technologies, Software Project Management

G.C.E. Advanced Level — Secondary Education

Mayurapada National College

Feb 2012 – Dec 2020 | Mawanella, Sri Lanka

CERTIFICATIONS

- Web Design for Beginners — University of Moratuwa, Centre for Open and Distance Learning (CODL), 2024
- Introduction to Containerisation: Docker Beginners Guide
- Ethical Hacker — Certified Ethical Hacking Fundamentals
- Operating Systems Basics

ACTIVITIES & LEADERSHIP

Organizing Committee Member 2025

IEEE Jamboree 2025, Zone C — Sri Lanka

—Coordinated logistics, scheduling, and on-ground operations for a large-scale engineering event, collaborating with cross-functional teams of IEEE members and volunteers.

—Demonstrated leadership, stakeholder communication, and project coordination skills in a deadline-driven environment.

Assistant Editor — Executive Committee 2026

IESL Student Chapter, The Open University of Sri Lanka — Nawala, Sri Lanka

- Serve as Assistant Editor on the executive committee of the Institution of Engineers, Sri Lanka (IESL) Student Chapter at OUSL, contributing to the chapter's official communications and publications.
- Assist in drafting, editing, and coordinating editorial content for newsletters, announcements, and event materials distributed to the engineering student community.
- Collaborate with fellow executive committee members to promote engineering excellence and professional development among OUSL students.

Committee Member 2024 – Present

Mechatronics Engineering Society, OUSL — Nawala, Sri Lanka

- Contribute to society workshops, technical events, and professional development programmes for the engineering student community at OUSL.
- Support knowledge sharing and peer mentoring activities, and assist in planning inter-faculty engineering initiatives.

Volunteer Graphic Designer 2022 – Present

Community Volunteer — Sri Lanka

- Designed logos, promotional posters, and digital marketing materials for community events serving 100+ participants, delivering consistent visual branding across all assets.
